TECHNICAL DATA SHEET

HYPER CLEAN +

HYPER CLEAN+

DESCRIPTION

Hyper Clean+ Tap & Tile Cleaner is a fast-acting specialty cleaning solution formulated for the removal of hard-water stains, limescale deposits and stubborn soap scum from taps, shower surfaces, sanitary ware and other compatible hard surfaces. Its combination of surfactants and emulsifiers assists in removing greasy, soil and dirt stains and helps lift deposits from surfaces. The presence of solvents assists the cleaning process by helping break down deposited dirt and dust, making surface cleaning easier. The product is designed for regular maintenance cleaning and is supplied ready to use.

2. KEY FEATURES & BENEFITS

- Ready to Use
- Fast Acting
- Easy to Use
- Helps remove hard-water stains
- Helps remove limescale deposits
- Helps remove stubborn soap scum
- Helps remove grease, soil and dirt deposits
- Suitable for cleaning CP fittings, sanitary ware and compatible fixture surfaces
- Suitable for selected interior and exterior cleaning applications

AREAS OF APPLICATION

- Hyper Clean+ is suitable for interior and exterior cleaning applications involving CP fittings, sanitary ware and compatible fixture surfaces. It can also be used on applications including chimneys, kitchen stoves, door handles, marble and tile flooring, ceramic and stainless-steel sinks, refrigerators, microwave ovens and taps, subject to surface compatibility testing.

Application

- Shake the container well before use. Always test the product on a small, inconspicuous area first. Spray the cleaner onto the surface, spread it with a soft scrubber and allow it to remain for 1–2 minutes. Gently scrub and rinse thoroughly with water to obtain a clean, glossy finish.
- For heavy stains, spray directly onto the affected area and gently scrub before rinsing. The process may be repeated when required.

COVERAGE Coverage depends on the nature and condition of the surface and the intensity of stains or deposits present. Actual consumption may therefore vary according to site conditions and application method.

STORAGE

After use, close the container tightly to prevent contamination and solvent loss. Store the product only in its original container. Store and use between 4°C and 40°C.

CAUTIONS

Protect neighbouring surfaces, including wood, plywood, landscaping and other sensitive materials, during application. Acids may etch, lighten or remove coatings from certain surfaces, and repeated acid washing may damage some materials. Do not mix with ammoniated cleaners, as harmful fumes may result. Hyper Clean+ is a highly acidic-based cleaner and should therefore be handled with appropriate care. Wear protective gloves, nose protection and eye protection before and during use. Always conduct a small-area compatibility test before full application. **KEEP OUT OF REACH OF CHILDREN.**

PACKAGING 1000 mL & 5000 mL
